Scientific Director,
The Council for Tobacco Research - USA, Inc.
900 Third Avenue
New York, NY 10022

Dear Sirs:

As medical director for our Ambulatory HIV Clinic, I am interested in funding sources for research projects in primary care for HIV infected patients. Specifically, we are attempting to investigate a possible correlation between tobacco use and CD4 cell levels. In a few of our patients we have noticed an increase in their CD4 cells after they have stopped smoking. We would like to investigate this issue in a more formal prospective study.

Please send information on your grant opportunities and application process in general, and any areas that may relate to tobacco use specifically.

Thankfully yours,

Andrew Steele, M.D.,
Medical Director, Adult Unit, ACC
